Table of Contents

I – The Development of New Public Management in Transition Countries .............................................................. 9
Michiel S. De Vries and Juraj Nemec
1. Introduction ......................................................................... 9
2. The background of the perceived need to involve the private sector ........................................................................ 14
3. The background of the perceived need for performance measurement ........................................................................ 17
4. The structure of this book .................................................... 18
5. Conclusion (and acknowledgements) .................................... 23

II – Reforming Public Governance: Some Lessons Learned .................. 25
Geert Bouckaert
1. Reform governance: five types .............................................. 27
2. Conclusion ........................................................................... 32

III – The New Public Management Then and Now: Lessons from the Transition in Central and Eastern Europe .................... 33
Wolfgang Drechsler and Tiina Randma-Liiv
1. The New Public Management and its demise ....................... 33
2. The Weberian and the Neo-Weberian State and other post-NPM approaches .......................................................... 36
3. The global financial crisis and the partial resurrection of the NPM ............................................................................... 38
4. The story of Central and Eastern Europe ......................... 40
  4.1. Immediate post-communist transition ..................... 41
  4.2. European Union influence on administrative reforms. 44
  4.3. Current challenges ...................................................... 46
5. Possible lessons ................................................................. 48
6. Acknowledgments ................................................................. 49

IV – Understanding Privatization and Public Private Partnerships in Brazil .......................................................... 51
  Christina Andrews
  1. Introduction ..................................................................... 51
  2. The politico-economic context ............................................. 52
  3. The rise of the post-developmental state........................... 54
  4. The PPP Law ........................................................................ 59
  5. The Future of PPPs in Brazil ................................................. 61
  6. Conclusions .......................................................................... 65

V – Public-Private Partnerships In Health Care In India .............. 67
  James Warner Björkman and A. Venkat Raman
  1. Introductory Context............................................................ 67
  2. Case studies .......................................................................... 68
    2.1. Contracting Out: Rajiv Gandhi Super-Specialty Hospital, Raichur, Karnataka ................................. 68
    2.2. Demand Financing: Chiranjeevi Yojana ‘Blessed for Long Life Scheme’, Gujarat............................... 69
    2.3. Co-Location: CT and MRI services, Sawai Man Singh Hospital, Jaipur, Rajasthan ............................... 70
  3. Policy Lessons....................................................................... 72
    3.1. Enabling Conditions ................................................... 72
    3.2. Equity and Accessibility .............................................. 73
    3.3. Selection of Private Partners and their Obligations .... 73
    3.4. Performance Specifications ......................................... 74
    3.5. Resource Implications .................................................. 74
    3.6. Timeliness ................................................................... 76
| 3.7.  | Autonomy                                      | 76  |
| 3.8.  | Technical and Managerial Capacity            | 76  |
| 3.9.  | Risk-sharing                                  | 77  |
| 3.10. | Stakeholder Perspectives                      | 78  |
| 4.    | Conclusions                                   | 79  |

**VI – Alternative Service Delivery Mechanisms: the South African Experience**

*Chris THORNHILL*

1. Introduction                                      81  
2. South African system of government               82  
3. Governance                                       84  
4. Community participation                           85  
5. Alternative service delivery arrangements in South Africa  86  
5.1. Forms of alternative service delivery mechanisms  88  
5.2. Recent developments                            94  
6. Selected challenges                               95  
7. Conclusions                                       98  

**VII – Performance Management/Budgeting in Russia**

*Andrey KLIMENKO*

1. Introduction                                      101  
2. Historical background                             103  
3. Introducing performance budgeting (RRMAs)         105  
4. Strategic and program-based performance management (KAGA)  109  
4.1. State programs                                 110  
5. Public organization performance tool             115  
6. Administrative regulations and public service standards  116  
7. Assessments and target indicators for performance of authorities  119  
8. Problems and lesson learned                      121  
9. Once again on motivation or price for the reform  124  

BRUYLANT 387
VIII – Public-Private Partnership in Health Care: Russia’s Experience . 127

Natalia S. Grigoryeva and Tatjana V. Chubarova

1. Understanding PPP in Russia: General Approaches ............. 128
2. Russian Health Care: the Role of the Private Sector ............. 129
3. Regulatory Framework for PPP in Russia .......................... 130
4. Forms of PPP in Russian Health Care .............................. 133
5. Main Problems and Challenges ..................................... 139
6. Conclusion .................................................................... 142

IX – Chinese Government Performance Management .......... 145

Sun Yingchun

1. Evolution of performance management in China ............. 145
2. Different ways of implementing performance initiatives in China ........................................................................ 147
   2.1. Internal management and capacity building ............... 147
      2.1.1. Objective Responsibility System (ORS) .......... 148
      2.1.2. Effectiveness Building .............................. 148
      2.1.3. Public services standardization ..................... 149
   2.2. External Review .................................................. 151
      2.2.1. Citizen Participation ................................. 151
      2.2.2. The Social Review ................................... 152
   2.3. Comprehensive Innovation .................................. 153
3. Main Achievements ....................................................... 154
4. Weaknesses and Needed Improvements ........................... 156
5. Conclusion .................................................................... 161

X – Performance-Based Budgeting: Kazakhstan Experience . 163

Asset Dulatbekov

1. Introduction ................................................................... 163
2. Development of Performance-Based Budgeting in Kazakhstan .................................................. 164
3. Preliminary Results ...................................................... 166
   3.1. Case study: Ministry of Education and Science of Kazakhstan ............................................. 166
3.2. Further analysis of the actual practice of PB .......... 171

4. Summary and Future Trends ................................................. 175

XI – Introducing Changes and Measuring Employee Satisfaction ...... 179
Stanka Setnikar Cankar and Veronika Petkovšek

1. Introduction ......................................................................... 179

2. Measuring employee satisfaction in public-sector organizations .................................................. 180

3. Measuring employee satisfaction as the part of organizational change .................................................. 183

3.1. Purpose and objectives ................................................ 187

4. Methods ............................................................................... 187

5. Results .................................................................................. 188

5.1. The effect of the implemented changes on employee satisfaction at work .................................................. 190

6. Conclusion ........................................................................... 191

XII – Externalization of Public Services and the Third Sector: Taking Stock of the Estonian Local Governments’ Experiences .. 193
Veiko Lember

1. Introduction ......................................................................... 193

2. The context .......................................................................... 195

3. Local governments’ experience in contracting with CSOs .... 197

4. Lessons learnt ....................................................................... 200

5. Conclusions .......................................................................... 203

XIII – Organizational Autonomy and Political Control of Hungarian Governmental Agencies – The Case of the Government’s ICT Policy .................................................. 205
György Hajnal and Krisztián Kádár

1. Introduction ......................................................................... 205

2. Politicization and political control ........................................ 206

2.1. Formal and de facto autonomy of agencies ................. 207

2.2. The research questions; data and method ............... 209
3. Institutional and political context .................................................. 211
   3.1. Agencies until 2010 .................................................................. 212
   3.2. Administrative policy after 2010 ............................................. 213
4. Agency dynamics, autonomy and political control in the GICT sector ................................................................. 216
   4.1. The policy context ................................................................... 216
   4.2. Formal autonomy versus structural autonomy of agencies ................................................................. 217
   4.3. Formal autonomy and political control .................................. 220
   4.4. Role of de facto autonomy ..................................................... 223
5. Conclusions .................................................................................. 224

XIV – Contracting and Outsourcing: Evidence from the Czech Republic and Slovakia ......................................................... 227
*Beata Mikušová Méričková and Juraj Nemec*

1. Introduction .................................................................................. 227
2. Frequency of contracting and outsourcing in Czech Republic and Slovakia ............................................................. 228
   2.1. Frequency of contracting in the Czech Republic and Slovakia .................................................................. 228
   2.2. Frequency of outsourcing in Czech and Slovak conditions ....................................................................... 230
3. Efficiency of contracting and outsourcing in the Czech Republic and Slovakia ....................................................... 231
   3.1. Efficiency of contracting in the Czech Republic and Slovakia .................................................................. 231
   3.2. Efficiency of outsourcing in Slovakia ........................................ 238
4. Discussion of results ....................................................................... 240
   4.1. Main limitations for successful contracting and outsourcing in the Czech Republic and Slovakia .... 241
5. Testing the quality of contract management: contracting and outsourcing in Slovakia ................................................. 243
6. Quality of contract management .................................................... 245
7. Testing the relation between factors and results of externalization .............................................................................. 246
8. Conclusions .................................................................................. 248
XV – Performance Measurement and Performance-Related Pay in Slovak Local Government

Tomas Jacko

1. Introduction ................................................................. 251
   1.1. Research questions.................................................. 252
   1.2. Research methods................................................... 254
2. Performance appraisal ................................................... 255
   2.1. Approaches to performance appraisal....................... 255
3. Performance-related pay............................................... 257
4. Research findings......................................................... 258
   4.1. Other significant results......................................... 262
5. Discussion ................................................................. 263
6. Conclusion ................................................................. 265

XVI – Performance Appraisal in Czech Self-Government

Dagmar Špalková and David Špaček

1. Introduction ................................................................. 267
2. Performance appraisals in the Czech Public Administration – Regulatory Framework ............................. 269
3. Performance appraisal on the level of self-governments ...... 271
4. Main Findings .............................................................. 274
   4.2. What is the link between general strategic documents and HRM strategies? ......................... 277
   4.3. What criteria are used in performance appraisal and how the performance appraisal is handled? What is the link between quality management and performance appraisal? ........................................... 278
   4.4. What procedures are used in performance appraisal and who is evaluated? .......................... 279
   4.5. What are the anticipated and real effects of implemented performance appraisal systems? ........... 280
5. Conclusion ................................................................. 282
XVII – Quality Management in the Czech Public Administration

David Špaček

1. Introduction ................................................................. 285
2. National framework ...................................................... 287
   2.1. National policies and strategies on quality management in public administration ............. 288
   2.2. Coordination rather than strictness and direct management ........................................... 289
   2.3. National quality awards and conferences ................................................................. 290
   2.4. Quality initiatives in the Czech Republic ................................................................. 290
   2.5. CAF ............................................................................ 292
3. Opinions of senior public servants about implementation problems and results of quality management initiatives ...... 293
   3.1. The applied method and respondents .................................................................. 293
   3.2. Main Findings ........................................................................ 295
   3.3. Factors supporting implementation and challenges faced ........................................ 302
4. Conclusions .......................................................................... 303

XVIII – Collaborative Benchmarking of Municipalities in the Czech Republic – Benefits and Problems

Michal Plaček and Milan Půček

1. Introduction ................................................................. 305
2. Research methodology .................................................. 306
3. Description and analysis of projects of collaborative benchmarking of municipalities in the Czech Republic ...... 308
4. Characteristics of chosen BM initiatives ................................ 310
   4.1. Project Price and efficiency .................................................. 310
   4.2. Benchmarking in the field of extended scope of municipalities of the 3rd type .................... 311
   4.3. Benchlearning within the National Network of Healthy Towns and Regions .................... 312
   4.4. Benchmarking of indicators of sustainable town development .................................... 313
4.5. International benchmarking of towns:
CAF Regional Benchlearning Project .......................... 314
4.6. Benchmarking Initiative 2005................................ 315
4.7. Benchmarking of local Agendas 21 ...................... 316
4.8. Benchmarking to support development and effective
management of sources of towns .............................. 317
4.9. International benchmarking to share
the good practice ..................................................... 318
4.10. Benchmarking in the project of Support of inter-
municipal cooperation ............................................. 319

5. Main benefits and problems of collaborative
benchmarking in the Czech Republic ....................... 320
5.1. Strengths/benefits of BM..................................... 320
5.2. Weaknesses, problems of BM ............................. 323

6. Conclusions .......................................................... 324

XIX – The Risks of Introducing NPM Tools in Transition Countries
Juraj Nemec and Michiel S. De Vries
1. Introduction .......................................................... 327
2. Private sector involvement (externalization) ............... 327
   2.1. Privatization .................................................... 328
   2.2. Public Private Partnerships ............................... 329
   2.3. Contracting and outsourcing ............................ 331
   2.4. Agencification ................................................ 332
   2.5. Conclusions ................................................... 334
3. Performance .......................................................... 335
   3.1. Program performance budgeting ....................... 337
   3.2. Performance management: public services .......... 339
   3.3. Performance management: human resources ....... 342
   3.4. Conclusions ................................................... 343
4. The problematic usage of NPM tools in countries in
transition .............................................................. 344
